

BENTONITE CEMENT PELLETS 2:1

Bentonite cement pellets are a quick, clean and easy alternative to using a slurry when grouting or decommissioning boreholes.

Typically, they will sink to depth through water and negate the need to use mixers, pumps and tremie pipes.

Available in 25kg bags.

Product Information

Colour	Light grey
Diameter	8 mm
Length	5 - 18 mm
Bulk density	1.05 - 1.15 g/ml
Specific gravity	2.20 - 2.50 g/ml

Typical Performance Characteristics

Contained swelling volume	20 - 30% (>48 hrs)
Settling velocity	40 cm/sec
Swelling onset	2 minutes
Strength	No commitment given

Typical Analysis (%)

SiO ₂	K ₂ O	MgO	TiO ₂	Fe ₂ O ₃	Na ₂ O	CaO	Al ₂ O ₃	Loss on ignition
55	1	4	1	7	3	22	12	6
