## GRADUATE GEOLOGIST - GROUNDWATER ENGINEER

### LOCATION

Predominantly UK project/site based with periods at Head Office Shropham, Norfolk

Stuart Wells are a leading and experienced specialist groundwater engineering company undertaking groundwater control, borehole testing services and ground freezing, predominantly within the UK civil engineering industry.

With a focus on geological knowledge and skill sets, which you would apply to everyday engineering problems and challenges. The role is interesting and varied and involves supervision and implementation of projects at UK civil/construction site locations, as well as office-based duties. It is a rewarding role and offers the opportunity to develop technical and commercial skills. Ideally, we are looking for somebody with experience but will consider graduates at entry level.

The successful candidate will work alongside our Technical and Project Operations Team to implement dewatering designs and testing specifications. With the process and assessment of geotechnical and geological information, in the delivery of construction dewatering and associated groundwater services.

### Roles and Responsibilities (not limited to)

- Supervising and supporting site and field operations in an effective and safe professional manner.
- Carrying out site assessment and testing with oversight of drilling and well installations.
- Coordinate and implement activities to requirements and standards.
- Record keeping, data processing and interpretation.
- Interpretation and preparation of data, proposals, and drawings.
- Supporting our Technical and Operational Team.
- Client liaison and coordination with multidisciplinary project teams.

### Skills & Experience

- BSc or predicted degree in Geology/Engineering Geology/ Geotechnical **or** minimum 2 years' experience in related background, with familiarity to industry standards and terminology.
- Ability to coordinate and communicate effectively and accurately in both verbal and written formats.
- Ability to work independently in the field and sites in various conditions.
- Be professional in your approach and judgment, with the ability to liaise at all levels.
- Good IT skills and problem-solving mindset.
- Full, clean driving licence essential.

### WORKING HOURS

- Office: 08:00 to 17:00; Site (varies) 07:30 to 17:30.
- Full time, Permanent.

### BENEFITS

- Company Pension Scheme (after qualifying period).
- Private Medical Scheme (after qualifying period).
- We encourage Continuing Professional Development with the Geological Society, ICE and other associated groups and organisations, and are committed to supporting candidates through the pathway to Chartership (CGeol).
- 23 days annual leave (plus statutory bank holidays).
- Salary TBC (depending on experience).
