

HANDHELD DIP METER

The light weight handheld dip meter measures the elevation of ground water in bore holes, piezometers, stand pipes and wells. It is accurate, robust, light weight and convenient to use.

It comprises of a probe, with spring steel treated tape, and winding cable reel in a rigid plastic case.

- Probe stainless steel shielded design
- Audio visual alarm on contact with water
- Water resistance sensitivity adjustment
- User's manual and warranty with tape conformity certificate

Applications: • Monitoring wells

• Water wells

• Groundwater monitoring

Length m	Tape		Probe		Reel	
	Coating	Type	Diameter mm	Length mm	Material	Diameter
10	LLDPE or TPU	Spring steel treated	12.7	100	Plastic	240
15	LLDPE or TPU	Spring steel treated	12.7	100	Plastic	240
20	LLDPE or TPU	Spring steel treated	12.7	100	Plastic	240
