

OCMA GRADE BENTONITE POWDER

OCMA (oil company materials association)-grade bentonite is a montmorillonite-based clay developed for oil and gas drilling applications.

It delivers rapid swelling and strong sealing performance, including in brackish water conditions. For optimum results, allow a minimum hydration time of four hours.

Available in 25 kg bags.

Applications: • Landfill gas well sealing • Grouting • Borehole sealing

Product Information

Colour	Light brown
Diameter	8 mm
Specific gravity	2.4 - 2.6
Bulk density	800 - 1000 kg/m ³
Dry screen analysis	Min 75% < 75 microns
