

PVC FLANGED WELL HEAD ASSEMBLY

Under new guidelines all water wells should be fitted with a fully sealed PVC Flanged Wellhead Assembly but must remain fully accessible. Stuart Well Services PVC Flanged Wellheads are designed & manufactured to meet these new regulations.

Our Flanged Wellheads are supplied with a blank top plate allowing you to position your required wellhead equipment in the most desirable position. When fully closed these units create a water tight seal.

- Available to suit 113mm, 125mm, 140mm and 165mm OD UPVC Pipe
